Professional Summary

Data Engineer with 5+ years of experience building scalable data pipelines, ETL workflows, and cloud architectures across Databricks, Azure, and AWS. Skilled in modernizing legacy systems, optimizing data lakes, and integrating Generative AI, RAG, and AI agents into data platforms.

Key Skills

- **Data Engineering & Big Data:** Databricks (Delta Lakes, DLTs), PySpark, Data Pipeline Optimization, ETL/ELT Architectures.
- **Cloud Platforms:** Azure (Azure Data Factory - ADF, Azure Data Lake Storage - ADLS), AWS (Lambda, Glue, S3, Athena, Step Functions, SageMaker).
- **Programming & Databases:** Python, SQL, R, PySpark, SQLAlchemy, SQLite.
- **AI & Gen AI:** Gen AI, RAG (Retrieval-Augmented Generation), Agentic Workflows, MCP (Model Context Protocol) Servers, LLMs (GPT), Prompt Engineering, Scikit-learn.
- **Tools & Workflows:** Git, Apache Airflow, Docker, CI/CD (GitHub Actions), Power BI, uv package manager, Pydantic, Streamlit.

Professional Experience

Senior Data Engineer Level 2 | Exusia (Globant Division), India
June 2024 - Present

- Architected cloud-native AI and Delta Lake architectures for HealthVerity on AWS Databricks, boosting query efficiency and processing scale.
- Engineered cloud data migration from legacy systems to Azure for FedEx using ADF, Azure Functions, and Databricks.

Accelerated FedEx legacy migration integration schedules by 30% using developer AI tools and automated workflows.

Data Engineer & Data Scientist | RAPP Indian Ocean (Formerly Hangar Worldwide), Mauritius
June 2021 - June 2024

- Designed high-throughput ETL/ELT pipelines on Databricks and AWS for enterprise content intelligence and advanced reporting.
- Constructed AWS S3 Medallion Architecture data lakes (Bronze, Silver, Gold), significantly improving analytical query performance.
- Architected scalable recommendation engines and ML pipelines using AWS SageMaker, Step Functions, Glue, Lambda, and Airflow.

- Refactored legacy Alteryx workflows into modular Python scripts, enhancing execution speeds, error handling, and pipeline maintainability.
- Automated SQL workflows and developed executive Power BI dashboards backed by Snowflake star-schema models.

Led technical seminars training cross-functional teams on cloud ecosystems and Databricks big data tooling.

AI & ML Engineer Intern | LokiBots
March 2021 - June 2021

- Developed AI-driven applications utilizing Google Document AI to parse and extract structured data from receipts and forms.
- Automated repetitive business processes through the deployment of LokiBots' Robotic Process Automation (RPA) tools.

Projects

- **Income Tax Buddy (Gen AI & RAG):** Developed an autonomous agent using RAG on income tax rule PDFs to seamlessly analyze user portfolios, calculate tax liabilities, and provide step-by-step ITR filing guidance.
- **Azure AI Pipeline Monitor (MCP Servers):** Built AI agents integrated within VS Code, connecting to Azure Cloud, SQL Server, and Power Apps via Model Context Protocol (MCP) servers to autonomously monitor end-to-end client pipelines.
- **Automated Documentation Agent (GitHub Integration):** Engineered AI agents connecting directly with GitHub to autonomously generate comprehensive PRDs, ASDs, and other technical documentation leveraging custom-built Agent skills.
- **Sentinel (AI Trading System):** Built a quantitative swing trading platform using AI agents, Python, uv, Pydantic, Streamlit, Plotly, and SQLAlchemy.

Education

MBA in IT & FinTech | Manipal University, Jaipur | 2022 - 2024

M.Sc. in Data Science and Computing | Sri Sathya Sai Institute of Higher Learning | 2019 - 2021

- CGPA: 8.4 | Dr. APJ Abdul Kalam Gold Medal for Academic Excellence.

BCA - Bachelor of Computer Applications | Sri Sathya Sai Institute of Higher Learning | 2016 - 2019

- CGPA: 8.1 | Dr. Viswanadh Pandit Gold Medal for Academic Excellence.

Certifications & Achievements

- **Recognized as "AI Hero"** at Exusia (Globant Division) for utilizing AI to significantly improve project delivery and quality.
- AWS Certified Data Analytics - Specialty, 2023
- Databricks Data Analyst Associate, 2023
- Winner - IBM Hack Challenge, Jury's Choice Award, 2020
